Frequencic International Research Team

COMPANY LTD
FREQUENCIC PRODUCT

We in frequencic international research team proudly announce that all frequencic products are completely individualized. They are being produced after receiving a specific psychological questionnaire from each person. Accordingly, delivered frequencic files will only be used for one single person who ordered it and would not be effective for any other person

About Us

Frequencic International Research Team Technology is the simplest, most affordable way to directly tap into your higher potential and unleash your power to think, create, heal and to change.

There's no training necessary, no need to travel anywhere, or spend hundreds of dollars on complicated home training programs that take up a lot of your valuable time. Just one Hour a day will bring outstanding results. When your brain is in balance, your ability to think, learn, create and recall is remarkably enhanced. Perception expands, memory improves and you can concentrate more easily. You sleep better and are more resilient to stress. A balanced brain brings freedom from fear, worry and even addictions that have stood in the way of you experiencing more fulfillment and

- You'll feel the effects from the very first time you listen.
- Frequencic International Research Team Technology Sync audio programs deliver pure and precisely tuned sound frequencies to the brain to drive brain activity into high level states of mind.
- Just as you turn the dial on a radio to get the station you want, with Frequencic International Research Team Sync you can tune your consciousness to the ideal state of mind.
- Programs are totally personalized based on each single person's characteristics.

What we do

Frequencic International Research Team Therapy sends pure, precisely tuned sound waves of different frequencies to your brain via stereo headphones. In his EEG research, Our Researchers discovered that when different vibrations, or sound frequencies, are delivered to the brain separately through each ear (as with stereo headphones), the two hemispheres of the brain function together to "hear" not the external sound signals, but a third phantom signal. This signal is called a binaural beat, and it pulses at the exact mathematical difference between the two actual tones. For example, a signal of 100 Hz delivered to the left ear, and a signal of 105 Hz delivered to the right creates a binaural beat of 5 Hz that in this case falls into the Frequencic range.

How we can order a frequencic file?

- 1) Choose the product from the catalog (Or find it in our website: www.frequencic.com)
- 2) Deposit the price (The account number is stated in the catalog)
- 3) Interact with the frequencic admins and send them the picture of your paid bill
- 4) Receive a specific psychological questionnaire, fill out that, scan or take a vivid photo of all pages and send the taken photos to us.
- 5) Send the picture of your signed informed consent stated at the end of your psychological questionnaire.
- 6) Send a picture of yourself to be inserted to your frequencic file (smiling picture)
- 7) Receive your individualized frequencic file from us.

Alpha brain wave

Alpha waves (8 to 12 Hz) are present when your brain is in an idling default-state typically created when you're daydreaming or consciously practicing mindfulness or meditation. Alpha waves can also be created by doing aerobic exercise.

Alpha wave (between 7 to 13 Hertz) is one of the most popular and enjoyable brain waves. Most of the time, this wave takes place while resting, relaxation and meditation and will shift to beta waves as a result of focusing and concentration. Consciousness is being gradually connected to the subconscious employing alpha waves.

We must mention that alpha waves act in contrast with beta waves and may activate the right hemisphere actions. These activities include expression of feelings, creativeness, artistic talent, consultation and sympathizing.

Athletes, Artists or scientists may set their minds on the alpha wave, consciously or unconsciously. This will lead to reduced stress levels and increased learning speed and gaining the highest level of personal skills, and that is how an artistic masterpiece is being created or a unique record may be made. It is interesting to know that brain may be in the alpha wave while meditating. These waves are the root of intuition, enlightenment, and interaction with your superior self. Alpha waves can be lead to an awareness and understanding via gradual elimination of time and place limitations which is far beyond our understanding. The alpha waves are also can be used in hypnosis.

Frequencic International Research Team

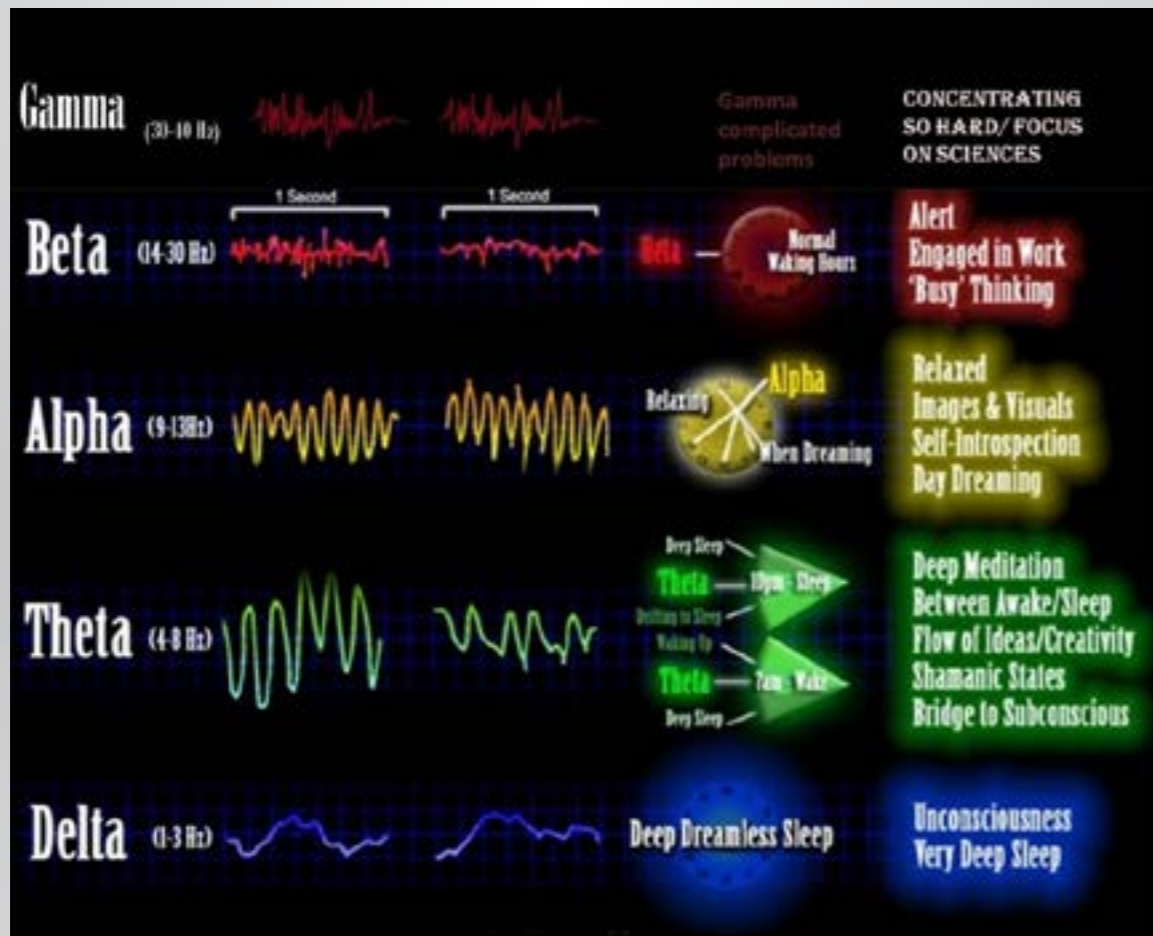

Beta brain wave

Beta waves (12 to 38 Hz)

Beta brainwaves are further divided into three bands; Lo-Beta (Beta1, 12-15Hz) can be thought of as a 'fast idle', or musing. Beta (Beta2, 15-22Hz) is high engagement or actively figuring something out. Hi-Beta (Beta3, 22-38Hz) is highly complex thought, integrating new experiences, high anxiety, or excitement. Continual high frequency processing is not a very efficient way to run the brain, as it takes a tremendous amount of energy.

Beta waves (12 to 38 Hz) are slightly slower than gamma waves and are related to the frontal lobe of the brain involving in complex thinking activities. When we are awake with normal consciousness, our brain is on beta mode. These waves are related to general affairs such as concentration as well as focusing on the outside world, different daily thoughts, analyzing, reasoning, calculation, language learning, talking, arguing, criticizing, confusion, distraction, and obsessive reasoning. If our mind quits its concentrated precise manner and moves a little towards relaxation, beta waves will stop. Increasing the amplitude of beta waves will lead to several problems such as resentment, stress, and obsession. Theta waves occur 4 to 7 times per second. The appearance of these waves is primarily dependent on people's moods. Theta wave attaining is possible during sleeping, but to experience these spectacular waves in other situations other than sleeping, we should mention that these waves only occur during deepest meditations in which we can have magnificent creativity. After passing the alpha mode and reaching theta part, the brain is being cleaned and the time and space concepts will disappear, and we get disconnected from the materialistic world. We naturally use these waves while sleeping and dreaming. Obvious dreaming happens in theta mode, and amnesia will occur in the absence of theta waves. if we produce theta waves, for example in deep meditation or via frequencic audio files, you'll be able to make a strong connection to intuition as well as your superior self and get a far greater awareness than you'd ever experienced.

Delta brain waves

Delta waves (.5 to 3 Hz)

Delta Waves, the slowest but loudest brainwaves

Delta brainwaves are slow, loud brainwaves (low frequency and deeply penetrating, like a drum beat). They are generated in deepest meditation and dreamless sleep. Delta waves suspend external awareness and are the source of empathy. Healing and regeneration are stimulated in this state, and that is why deep restorative sleep is so essential to the healing process.

Delta waves with a frequency of 1 to 3 cycles per second, are the slowest brain waves and often appear during deepest sleepings. Noteworthy, If brain waves reach to zero points, we will die, so Delta waves are the lowest level of consciousness. People who are in a coma or have close to death also experiences such frequencies. If we tell you that you can turn your brain to delta mode consciously, you will be amazed. Our awareness about time, place, our body and thoughts are being cut throughout delta waves. Delta waves are known as a super consciousness-related rhythm, and it is believed to be associated with multidimensional consciousness and can be a connection to higher consciousness. Association with the root of superior self and drowning in pantheism happen in delta mode of the brain which is the wish of seekers. Delta waves are being activated in close-to-death experiences, OBE(out of body experiences) and separation of the soul from the body.

Theta brain waves

Theta waves (3 to 8 Hz)

Theta brainwaves, occur in sleep and are also dominant in deep meditation.

Theta brainwaves occur most often in sleep but are also dominant in deep meditation. Theta is our gateway to learning, memory, and intuition. In theta, our senses are withdrawn from the external world and focused on signals originating from within. It is that twilight state which we normally only experience fleetingly as we wake or drift off to sleep. In theta we are in a dream; vivid imagery, intuition and information beyond our normal conscious awareness. It's where we hold our 'stuff', our fears, troubled history, and nightmares.

Theta waves generate the theta rhythm, a neural oscillatory pattern that can be seen on an electroencephalogram (EEG), recorded either from inside the brain or from electrodes attached to the scalp. Hippocampal theta waves, with a frequency range of 10-16 Hz, appear when a rat is engaged in active motor behavior such as walking or exploratory sniffing, and also during REM sleep. Theta waves with a lower frequency range, usually around 5-10 Hz, are sometimes observed when a rat is motionless but alert. The hippocampal theta rhythm depends critically on projections from the medial septal area, which in turn receives input from the hypothalamus and several brainstem areas. Hippocampal theta rhythms in other species differ in some respects from those in rats. In cats and rabbits, the frequency range is lower (around 7-8 Hz), and theta is less strongly associated with movement than in rats. In bats, theta appears in short bursts associated with echolocation. In humans, hippocampal theta rhythm has been observed and linked to memory formation and navigation.

Gamma brain waves

Gamma waves (38 to 42 Hz)

Gamma brainwaves are the fastest of brain waves and relate to simultaneous processing of information from different brain areas. Gamma brainwaves are the fastest of brain waves (high frequency, like a flute), and relate to simultaneous processing of information from different brain areas. Gamma brainwaves pass information rapidly and quietly. The most subtle of the brainwave frequencies, the mind has to be quiet to access gamma. Gamma was dismissed as 'spare brain noise' until researchers discovered it was highly active when in states of universal love, altruism, and the 'higher virtues'. Gamma is also above the frequency of neuronal firing, so how it is generated remains a mystery. It is speculated that gamma rhythms modulate perception and consciousness, and that a greater presence of gamma relates to expanded consciousness and spiritual emergence.

Gamma waves with a frequency of 40-100 (and sometimes up to 100+) Hz are the highest frequency among the brain waves. These days such waves rarely produce in the brain. They have an important role in the function of memory and concentration. Equivalences and complicated mental problems are being solved in these waves. In complex tools utilizing, we also need the activation of these waves. In order to learn complex multidimensional matters, it's necessary to increase the range of gamma waves and if not, you can't solve such problems

SMR brain waves

The sensorimotor rhythm (SMR) is a brain wave. It is an oscillatory idle rhythm of synchronized electric brain activity. It appears in spindles in recordings of EEG, MEG, and ECoG over the sensorimotor cortex. For most individuals, the frequency of the SMR is in the range of 13 to 15 Hz.

SMR waves can increase the integrity between the mind and body, and also can strengthen the processing ability, increase synchronizing between the environment and a person, empower falling sleep and regulating sensory-motor rhythm. SMR connects the activity of the brain and body. The individuals increase SMR waves as a result of being awarded. these waves can cause a decline in muscular tension.

Research Findings:

A 2014 article on Brainwave Entrainment published in the Huffington Post discusses the work of Deepak Chopra and Dr. Rudi Tavi, Professor of Neurology at Harvard Medical School:

“Research from Washington University School of Medicine in St. Louis shows that when people’s brains are in a Delta brain wave state, beta amyloid production in the brain ceases and the toxic material is cleared away. One thought is to explore the possibility of using brain entrainment technology to help treat Alzheimer’s, but at this point all it is being used for is to help people meditate, relax and dream instantly and effortlessly.”

The positive impact of Subliminal Messaging is discussed in Psychology Today from an article published in 2015:

“Two recent studies on subliminal messages have found that subconscious visual cues can improve athletic performance and reduce negative age stereotypes of physical ability.”

“Brain Power is a well-researched, well-referenced and practical guide to maintaining and improving your mind as you age. It provides proof that the brain can adapt, grow and learn new skills with age. In acoustics, a beat is an interference pattern between two sounds of slightly different frequencies, perceived as a periodic variation in volume whose rate is the difference of the two frequencies.

With tuning instruments that can produce sustained tones, beats can be readily recognized. Tuning two tones to a unison will present a peculiar effect: when the two tones are close in pitch but not identical, the difference in frequency generates the beating. The volume varies like in a tremolo as the sounds alternately interfere constructively and destructively. As the two tones gradually approach unison, the beating slows down and may become so slow as to be imperceptible. As the two tones get further apart, their beat frequency starts to approach the range of human pitch perception,[1] the beating starts to sound like a note, and a combination tone is produced. This combination tone can also be referred to as a missing fundamental, as the beat frequency of any two tones is equivalent to the frequency of their implied fundamental frequency. “Brain Power is a well-researched, well-referenced and practical guide to maintaining and improving your mind as you age. It provides proof that the brain can adapt, grow and learn new skills with age. Even better, the tools provided are practical, achievable, and proven.” Advocates of this type of therapy currently recommend it for the treatment of anxiety, stress, and related disorders. This self-help treatment is usually available in the form of audio recordings that a person listens to on stereo headphones.

frequencic products list

\$ 135

Removing mental barriers to conquer the hearts

All human beings tend to look popular and beloved. However, for achieving this feature, we primarily need to remove the mental barriers against it.

\$ 135

Removing mental barriers to marriage

Choosing a spouse is one of the greatest and most important challenges of young boys and girls, and if only this decision is made correctly, we can prevent lots of future problems. In not so long ago, it was believed that the future cannot be predictable, but today, we believe that we can able to have a great marriage by removing the mental barriers against this.

\$ 135

Faith increase

According to valid scientific researches, having a strong faith in God can have a great impact on mental and body health. Based on this proved scientific evidence, we tried to establish this characteristic in a person who uses this product.

\$ 135

Become popular among people

If you want to be popular between family and friends, you firstly need to change your attitude. We in this product tried to change your incorrect beliefs and settle efficient beliefs.

\$ 135

Loving yourself

Psychologists believe that most of the neuropsychologic problems come from the way we feel about ourselves. What's your answer to «how much do you love yourself?» If your answer is anything but very much, you need this product.

\$ 135

Fixing the long time

When someone is filled with rage and cannot revenge, there will be no options other than suppressing his or her rage. This rage causes obsession and turns to hatred. It means that this feeling is a constant burden and we should try to remove this problem..

\$ 135

Frequencic Speed Reading

In today's competitive world in which information is updating and growing so fast, the need to read and learn is being felt more than ever. This product has tried to improve your speed of reading via two different ways, the first, through increasing your mental ability for focusing, attention, memory and speed reading, and the second, by instructing the fast reading techniques.

\$ 135

Reducing resentment

Resentment is an internal emotional reaction that causes anger and if it's not resolved, it can be stored and endanger your health. Although Resentment is an inseparable part of human communications, we should not keep it forever because living with resentment, threatens our mental health and hurts it.

\$ 135

Anger relief

We all know what anger is, and we've experienced it. Anger is a natural feeling that comes from a healthy mind. However, if it goes out of control and become destructive, it can cause some problems in the workplace, personal relationships, and your whole life. Besides, anger can endanger your physical and mental health. Therefore, we must be able to control our anger. The» Anger relief product» tried to manipulate your subconscious mind to give you the ability to control your anger.

Melting Bad Memories

\$ 135

Bad memories may happen for everyone in their life. We should find a way to cope with and clean those bad memories. In this product, we tried to help your subconscious mind to overcome these conditions.

improve educational performance

\$ 135

For improving educational performance, everybody should be good at attention, memory, concentration, and endurance. In this product, we tried to improve the aforementioned abilities.

Increase creativity

\$ 135

Creativity refers to an unusual way of thinking and interpreting which can lead to innovation. We need this ability for success in all aspects. In this product, we used special audio frequencies to promote creativity.

Winning

\$ 135

Reaching to this belief that I can be a winner or champion than a loser needs mental preparation. In this product, we have tried to provide you with the required mental preparation.

Championship

\$ 135

Reaching to this belief that I can be a winner or champion than a loser needs mental preparation. In this product, we have tried to provide you with the required mental preparation.

Job Success

\$ 135

Are you seeking for job success or job promotions? You may need this product which can remove all mental barriers against your job success.

\$ 135

Increase Concentration

Concentration is the practical performance of the brain and mind. Promoting concentration has the strongest effects on the mental function and brainpower of humans. A brain with a weak functional performance is similar to a company with an inappropriate manager. In this product, we tried to increase the ability of concentration using proper brain waves.

\$ 135

Increase Long-Term Memory

Long term memory is crucial for saving daily information for a long time. If you're able to remember something that has happened several hours or several decades ago, that piece of information is related to the long term memory. With this special product, long term memory will increase.

\$ 135

Increase Short-Term

When a person experiences short-term memory loss, he or she can remember incidents from 20 years ago but is fuzzy on the details of things that happened 20 minutes prior. Sometimes such problems may refer to mild cognitive impairments, so we should do proper measures for preventing severe cognitive impairments. In this product, we tried to prevent harm to the short memory.

\$ 135

Eliminating negative thoughts

Negative thoughts are important obstacles among lots of people in society. These thoughts steal a significant part of the individual's mental capacity, and if you keep on thinking about them, which is known as obsessive rumination in psychological topics, this may lead to chronic depression.

\$ 135

Internal Stress Relief

Removing stress is the goal of many scientists around the world. What we should be aware of is that most of the stresses come from our settled beliefs in our subconscious mind, and if we could amend these beliefs, we can cope with stress.

\$ 135

Eliminating Abnormal Habits

Take a look at yourselves. How many bad habits can you see in yourself? For sure, the reason that you have decided to read this text is that you may have a habit that you want to get rid of it and replace it with better habits. Bad habits disrupt your life and prevent you from reaching your goals -they may even threaten your health- and waste your mental and physical energy and time.

\$ 135

Preventing Masturbation

Preventing the masturbation product sets your subconscious on changes in behavioral patterns and mental algorithms.

\$ 135

Sixth Sense

An ability to know something without using the ordinary five senses of sight, hearing, smell, touch, and taste. This ability can be promoted by balancing brain waves.

\$ 135

Interest in studying

Like any other action, tending to read books and use the knowledge of the others requires an internal enthusiasm. This won't happen suddenly and needs perseverance, patience, and concentration. This product settles interesting in studying.

\$ 135

Deep Relaxation

Deep relaxation is the antidote of stress. Deep relaxation can be dramatically effective in relieving symptoms such as inflammation, anxiety, and muscle tension. It can be a lifesaver when dealing with stress and life crises.

\$ 135

Message to the Universe

The rule of attracting the universe is a universal rule for reaching wills and wishes. If you're aware of it and employ that, you'd be able to capture any will or goal you have. In this product, we tried to activate this rule in persons who will use it.

\$ 135

Deep Sleep

During deep sleep, glucose burn increases in body and brings additional support to short term and long term memory and overall learning. During the deep sleep pituitary gland also releases some important hormones such as growth hormone which leads to growth and development of the body.

Getting Rid Of Sin

\$ 135

Human is built in such a way that needs motivation and feel of joy. But before that, you should forgive yourself and get rid of sins.

Removing mental barriers to immigration

\$ 135

This frequencic audio file is made based on audiences' needs during migration and residency problems. No resistance is as strong as mental resistance.

Total Relaxation

\$ 135

فایل نهایت آرامش و سکون برنامه ریزی ضمیر ناخودآگاه شما را براساس تغییر الگوهای رفتاری و تغییر الگوریتم ذهنی صورت می دهد .

Drug Addiction

\$ 135

Psychedelics are a group of drugs that can be addictive due to their effect or perception. Although all of these drugs may cause serious side effects and some of them can be so addictive. People who use psychedelics, will be mentally and physiologically dependant.

Quit Smoking

\$ 135

For quitting cigarette you need to change something in your subconscious mind. By relying on yourself and using the audio reprogramming frequencic files, you can overcome this bad habit.

\$ 135

Stablishment of 8 important habits

Our destiny has a direct relationship with our habits. If we manage to set effective and useful habits, our progress speed increase at a high rate. The international frequencic research team has presented a new and different product by which people can establish 8 effective habits in their subconscious. These habits include :

- 1) daily planning
- 2) regular exercise
- 3) relaxation in life
- 4) creative thinking
- 5) happiness and living at the moment
- 6) regular sleeping
- 7) being decisive and reach mind attitude
- 8) gratitude

In our team, we believe that this product is a human making product.

\$ 135

Power of Mind

We have approximately 120 billion neural cells in our brains and each cell can be communicated with about one million neurons. what a great network?!! If we could increase our power brain, the huge good changes will happen to our life. With using this product, you can achieve superhuman power.

\$ 135

Confidence

Self-confidence means believing in your own strength and abilities. Everybody should believe in himself to do big movements. This product has been designed to reach that goal.

\$ 135

Overcoming Alcohol Addiction

The harmful effect of alcohol has been proved in many studies. In this product, we in the international frequencic research team, with regards to amending the badly formed circuits following long term alcohol consumption, designed a product that can help those who are addicted to alcohol.

\$ 135

UNHEALTHY RELATIONSHIP

For a healthy relationship with your partner or wife, you need to have some fundamental characteristics. The aim of this product is to establish these features.

\$ 135

OCD(Obsessive-Compulsive Disorder)

OCD is a kind of disorder that causes obsessive thoughts and can lead to obsessive actions. This disorder mostly begins in childhood or adolescence. The person is usually aware of his behavior and wants to quit it, but due to apprehension and other irritating feelings that come after rejecting the obligation, he or she won't succeed in making it. This magnificent product will help those who have this problem to overcome that.

\$ 135

The miracle of gratitude

The habit of gratitude can change your life, not only mentally but also physically. The aim of this product has been designed for this goal.

\$ 135

Attract Good Things

Attracting good events audio frequencic file sets your subconscious on changes in behavioral patterns and mental algorithms.

\$ 135

Laziness Remedy

Laziness means rejecting the stuff that needs to be done. It has various reasons. For example, sometimes some tasks are so boring that doing them is difficult or in some cases, doing a task individually is hard and as a result, the primary motivation will disappear. Whatever the cause is, it should be treated. By treating laziness, a mass of energy gets injected into our lives and makes our lives more beautiful.

\$ 135

Frequency of libido

Talk about it from the beginning and don't let it become a chronic long term problem, the libido. Ignoring this topic turns it into a serious problem and a lack of interest.

\$ 135

Happiness Hormones

Hormones such as serotonin and dopamine have a crucial role for being happy. In this product, we used special frequencies for elevating such hormones.

\$ 135

Increased interest among couples

For increasing love between spouses, we need to remove the barriers in your subconscious which prevents you from manifesting interest. If you feel your spouse doesn't like you or vice versa, this product is recommended to you.

Five layers wealth

\$ 180

Attracting five layers of wealth sets your subconscious on attracting wealth using frequencic waves and emphasizing sentences. This product is one of the most valuable products of our team. In this product, some special regions of the brain are identified which have an important impact on seeking wealth and they were being activated audio frequencic files.

Revenue Increase

\$ 171

Revenue increase and increase sales product» will reprogram your subconscious on changes in behavioral patterns and mental algorithms for achieving more revenue.

Career-attraction

\$ 135

Besides having all requirements, you need to have the mental preparation for getting a job. This product will get you ready mentally for getting your propper job.

Suggestopedia

\$ 135

The process of learning a new language will be more efficient if only psychological and cognitive barriers get removed. An interventional research team of frequencic accelerates the language learning process employing modern sciences and frequencic waves. Frequencic audio files increase learning speed from 30 to 2100. A lot of people fail in IELTS and TOEFL exams while they could pass the test with a 10 percent better function.

Communication skills

\$ 135

It can be stated for sure that learning the speech skills and having effective communication skills, are the factors that everyone requires in order to improve and get succeed. In this product, we have tried to decrease fear of speech, stress, and thoughts of being judged by the others as well as increase self-confidence and communication skills. This product will be with an instructional book in which speech techniques are taught.

Fear of Darkness
Nyctophobia

\$ 99

Many kids and adults are known to suffer from the fear of darkness or night phobia. Several non-clinical terminologies are used for describing this phobia, namely: Nyctophobia, Scotophobia, Lygophobia as well as Achluophobia.

Beauty judgement

\$ 99

It is an intense, persistent fear of being watched and judged by others. This fear can affect work, school, and your other day-to-day activities.

fear of Entrance Exam
Examinophobia

\$ 99

If you regularly become excessively nervous before or during an important exam, you may have "testophobia". It is mostly called "examinophobia" or "exam fever". It is a very common phenomenon among students especially when an important examination is at their door step.

Fear of exams
Examinophobia

\$ 99

If you regularly become excessively nervous before or during an important exam, you may have "testophobia". It is mostly called "examinophobia" or "exam fever". It is a very common phenomenon among students especially when an important examination is at their door step.

Fear of Unemployment
Ergophobia

\$ 99

Ergophobia. Ergophobia, ergasiophobia or ponophobia is an abnormal and persistent fear of work (manual labor, non-manual labour, etc.) or fear of finding employment. It may be a form of social phobia or performance anxiety.

Fear of fatness
fatphobia

\$ 99

fatphobia Fear and dislike of obese people and/or obesity. Fear or obsessive avoidance of consuming fat.

fear of animal
Zoophobia

\$ 99

Zoophobia or animal phobia is a class of specific phobias to particular animals, or an irrational fear or even simply dislike of any non-human animals. Examples of specific zoophobias would be entomophobias, such as that of bees (apiphobia).

fear of being skinny
Dysmorphia

\$ 99

The intense fear of being skinny. ... The obsessive-compulsive disorder, also known as muscle dysmorphia, pushes patients to exercise relentlessly

Fear of Future
Chronophobia

\$ 99

Chronophobia is a specific psychological phobia which manifests itself as a persistent, abnormal and unwarranted fear of time or of the passing of time. A related but much rarer phobia is chronomentrophobia, the irrational fear of clocks and watches.

Fear of hospitals
Nosocomophobia

\$ 99

Nosocomophobia, or the fear of hospitals, is a surprisingly common medical phobia. In fact, U.S. President Richard Nixon was said to have a fear of hospitals, reportedly refusing treatment for a blood clot as he was concerned he would "not get out of the hospital alive."

Fear of illness
Nosophobia

\$ 99

Nosophobia is the irrational fear of having a specific disease. The origins of the word Nosophobia come from 'nosos' and phobos which mean disease and fear in Greek. In recent years, nosophobia has also been referred to as cyberchondria.

Fear of Commitment
Gamophobia

\$ 99

Gamophobia is the fear of commitment, though it can also be the excessive, persistent, uncontrollable and irrational fear of marriage. It is derived from the Greek word Gamos which means marriage and phobos meaning fear.

fear of cancer
Carcinophobia

\$ 99

Carcinophobia is the fear of cancer. The origin of the word carcino is Greek (meaning cancer) and phobia is Greek (meaning fear). Carcinophobia is considered to be a specific phobia.

Fear of Child Birth
Tokophobia

\$ 99

for some women, the fear of labour and birth can be so overwhelming that it overshadows their pregnancy and affects daily functioning. This severe fear of birth is called tokophobia – which literally means a phobia of childbirth. And for some women, this also includes a dislike or disgust with

fear of Death
Thanatophobia

\$ 99

Also referred to as thanatophobia (fear of death), death anxiety is distinguished from necrophobia, which is a specific fear of dead or dying people and/or things (i.e., fear of others who are dead or dying, not of one's own death or dying).

Fear of No Money
Chrematophobia

\$ 99

Chrometophobia and Chrematophobia originate from Greek chermato meaning money and phobos meaning deep aversion, dread or fear. ... However, to a person suffering from Chrematophobia, dealing with money is extremely difficult.

fear of Chemotherapy
chemophobia

\$ 99

Chemophobia (or chemphobia or chemonoia) is an aversion to or prejudice against chemicals or chemistry.known as Cancerophobia.

Fear of Infertility
Tocophobia

\$ 99

Tokophobia is a distressing psychological disorder which may be overlooked by medical professionals; as well as specific phobia and anxiety disorders, tokophobia may be associated with depression and post-traumatic stress disorder.known as Cancerophobia.

fear of Driving
vehophobia

\$ 99

Vehophobia, or the fear of driving, is a very real issue suffered by many people. ... The word "vehophobia" comes from the Latin word veho meaning, "drive", and the Greek word phóbos meaning, "fear".

fear of water
Aquaphobia

\$ 99

Aquaphobia is a specific phobia. This is an irrational fear of something that doesn't cause much danger. You may have aquaphobia if you find that any source of water causes you an excessive amount of anxiety. This can include a swimming pool, a lake, an ocean, or even a bathtub.

Fear of losing someone you love
Thanatophobia

\$ 99

Fear of losing someone you love is a common fear. (or something happening to someone you love.) These fears comes from a great love

fear of spiders
Arachnophobia

\$ 99

Arachnophobia is the unreasonable fear of spiders and other arachnids such as scorpions. Treatment is typically by exposure therapy, where the person is presented with pictures of spiders or the spiders themselves.

fear of an accident
Dystychiphobia

\$ 99

Dystychiphobia is the fear of accidents. People with this fear worry they might hurt themselves or someone else. They also fear causing property damage. The origin of the word dys is Greek (meaning bad), tych is Greek (meaning accident) and phobia is Greek (meaning fear).

fear of oldness
Gerascophobia

\$ 99

Gerascophobia is a clinical phobia generally classified under specific phobias, fears of a single specific panic trigger. Gerascophobia may be based on anxieties of being left alone, without resources and incapable of caring for oneself due to age-caused weakness.

\$ 99

Fear of failure or defeat
Kakorrhaphiophobia

is an abnormal, persistent, irrational fear of failure. In clinical cases, it's debilitating: the fear of even the most subtle failure or defeat is so intense that it restricts a person from doing anything at all.

\$ 99

fear of being alone
Autophobia

Autophobia, or monophobia, is the fear of being alone or lonely. Being alone, even in a usually comforting place like home, can result in severe anxiety for people with this condition. People with autophobia feel they need another person or other people around in order to feel safe.

\$ 99

Phobia of divorce
Arachnophobia

Fear can be a debilitating factor before, during, and after the divorce process. There is psychological reasoning that we experience fear during the end of a relationship. For parents, they should not allow fear for their children's well-being as reasoning to stay in a dysfunctional or volatile relationship.

\$ 99

Glossophobia

speech anxiety is the fear of public speaking. The word glossophobia derives from the Greek γλῶσσα glōssa, meaning tongue, and φόβος phobos, fear or dread. Some people have this specific phobia, while others may also have broader social phobia or social anxiety disorder.

\$ 99

fear of earthquakes
Seismophobia

There are hundreds of thousands of phobias and Seismophobia is one of the most common ones if you live in a seismic hazard zone. It is defined as the extreme, often irrational fear of earthquakes.

\$ 99

fear of altitude
Acrophobia

Acrophobia is an extreme or irrational fear or phobia of heights, especially when one is not particularly high up.
